NOT MUCH DOING IN STOCK MARKET

Virtual Stagnation Follows Little Spurt During First Hour of Session.

NEWS OF THE DAY HAS DEPRESSING INFLUENCE

Death of Cleveland and Illness of James S. Sherman Both Felt in Street.

NEW YORK, June 24.—The complexion of affairs in the stock market today took on a colorless hue and the trading sank almost to the point of idleness. A large proportion of the day's scanty total of shares transferred was sold in the first hour of the sossion. This little spurt of activity subsided immediately and practical starnation ensued. This extreme duliness is not unseasonable.

There were items in the day's news which prompted a mood of dwelling on the mutabilities of human affairs and the uncertainty of assuming an outcome seemingly in prospect. The serious illness of the Republican nominee for Vice-President seemed to have the effect of implicating the situation incident to the progress of a political campaign, while the death of ex-President Cleveland came as something of a shock to the public and had a material influence in deepening the prevailing mood. The announcement of the booking of return passage to Europe for J. P. Morgan for tomorrow confirmed the assurances of the purely personal and family grounds for his sudden return to this country in the midst of his usual foreign vacation.

News of the discontinuance of diplomatic relations between the United States and Venezuela was ignored, apparently. Weather news is scanned with constant attention, and any movement in the commodities markets that may be rilled on as a true index of crop conditions is looked for closely. London was said to be a buyer of stocks here on a moderate scale, and this heips to an early show of firmness. The extreme ease of call money is attributable to some temporary accumulations in preparation for the July settlements. No engagements of each of the public settlements of each of the public settlements of each of the public settlements.

Iron Trade Review.

CLEVELAND, O. June 24.—The Iron Trade Review tomorrow will say:
Continued activity in tron and steel bars, a part of the demand coming from railroad interests, has been an encouraging feature of the week, and indications are not inciking that considerable buying for repairs of equipment and for maintenance of way by the railroads will not long be delayed. Several Western trunk lines have given orders for the immediate repair of track and rolling stock and already specifications for a large tonnage of iron and steel and other equipment have been received.

There is an immense demand for agricultural machinery and some manufac-

There is an immense demand for agricultural machinery and some manufacturers of agricultural implements are working night and day. There has been also some improvement in the demand for merchant pipe, but in plates, shapes, sheets and other finished lines the volume of business is very small.

Sales of from at the reduced prices are being made at a moderate rate. Many more vessels are in commission on the lake, but an independent company is having trouble in obtaining labor for cargoes. The labor situation is still unsettled.

RALLY IN WHEAT AT CLOSE OF SESSION

and Good Weather; Bulls Finally Rule.

CHICAGO, June 24 .- The wheat market pened weak because of lower cables and eneral clear weather in the Southwest. Sentiment continued bearish until late in the day, when shorts became active bidthe day, when shorts became active bidders, resulting in a rally of more than to in all deliveries. The feature of trade was heavy sales of July and the purchase of September by elevator interests, which caused the latter option to rise to it premium over July. The active buying late in the session was due to the black rust reports from Nebraska and to a better demand for cash wheat both here and at the seaboard. The market closed firm. July opened ic lower to ic higher, at \$55c to \$55c, and then advanced to \$65c. The close was at \$8c.

Corn was weak during the last half of the session because of the break in wheat and because of the favorable weather for the new crop. The market closed firm. July opened ic to ic lower, at \$55c to 69c, sold off to \$55c, and then advanced to \$55c. The close was at \$55c.

There was considerable of profit-taking in oats early in the day, owing to the break in other grain and to improved crop reports, advices from Indiana and Illinois claiming the drought in those States had been broken by rain last night. Later in the day the market rallied along with wheat and corn. July opened in the day-to-rait 44fc, sold off to 44gc and then advanced to 45gc, where it closed.

Provisions opened firm on buying of a general character, which was prompted by a 5c to 10c advance in live hogs. Later the market lost most of its firmness, owing to profit-taking sales and to selling by local packers. At the close September pork was 5c higher. Lard was unchanged, and rigs were a shade lower. MARKET MEN DISPLAY PROVO STRAWBERRIES

Weak Opening on Lower Cables | Fine Variety of Luscious Fruit Is Received on the Produce Market.

Aside from the usual supply of California products, two carlonds of excellent strawberries from Provo were the most important arrivals on the produce market Wednesday. The berries are thoroughly ripe, and are among the best seen on the market this season. The fruit retailed at 10 cents a box.

An inferior grade of Utah strawberries could be had for \$1-3 cents a box, and the Hood River variety remained at 15 cents. The price of the latter, however, probably will take a tumble today, as a sarpe consignment arrived from Oregon Wednesday night, and will be placed on the market the first thing this morning.

the market the first thing this morning.

Quotations on bananas fell 5 cents, making the retail price 15 cents a dozen. Larger sized varieties of the luscious fruit could be obtained at 20 and 25 cents a dozen. The reduction resulted in a marked increase in sales.

Cherries, both Utah and California varieties, were extremely plentiful at 6 cents a pound, and the chances are that within the next day or so the fruit will become considerably lower in price, as the supply is growing large. consideranty lower in price, as the capped is growing large.
